

STS Air Filter Pro Smoke Absorber with Portable Stainless-Steel Case

Product Description:

The STS Air Filter Pro absorbs and filters any gases or dust and can achieve 99.97% purification rate, which prevents environmental pollution.

Specifications:

Voltage: 110V

Air velocity: 14m/s

Noise<55db

System traffic: 180m³/h

Number of filter layers: 3

Max power: 80W

Case material: stainless steel

Weight: 9kg

Wide applications: Soldering iron welding station; Laser welding, engraving, marking, cutting; Chemistry laboratory; Medical treatment, cosmetology, etc.

Two-year warranty!

Features:

Parameters - Air velocity: 14m/s; Noise<55db; System traffic: 180m³/h; Number of filter layers: 3;
Max power: 80W; Case material: stainless steel.

Greater Dust Capacity - Square vertical filter core has larger dust capacity than single-layer filter core.
Longer service time of filter core.

Movable And Adjustable - The smoke absorbing pipe can be disassembled, and the length of the pipe can be adjusted. There are four brake type universal wheels at the bottom of the machine, which makes the Smoke Absorber convenient to move.

Easy To Use - The Solder Fume Extractor Purifier is plug-in. You can press the button to adjust the suction and there are three levels to choose from.

Benefits:

Variable frequency DC motor-more energy saving

Square vertical filter core-larger dust capacity

New type noise reduction system-quieter and more comfortable

Aerodynamic diamond rubber cover

Small size with large capacity

Nipple pattern bamboo duct-suitable for various tables
